

*Your home deserves the best, protect yourself
against the elements and intruders*

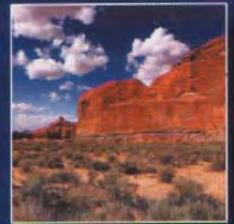

Double Glazed Windows & Doors UPVC Frames

**Building or Living
near the ocean,**

**in the windy
hills,**

**in scorching
desert like heat,**

**or maybe in wet,
cold conditions?**

EUROPEAN TECHNOLOGY & QUALITY

Established Since 1995

**Double Glazing • UPVC Frames • Noise Reduction • Thermal Insulation
• High Security • 100% Weather proof • 100% Maintenance Free**

Most Australian's choose the wrong windows.

Don't be one of them.

LIGHT + SUN

Light and Sun

uPVC Windows and doors are **100% UV stabilized**, they do not go brittle, distort, flake, crack, yellow or tarnish. They are very environmentally friendly when produced and during its long lasting service life. All our products are 100% weather and waterproof. No rattling, whistling or leak's guaranteed.

SECURITY + SAFETY

Security

Our windows and doors are **reinforced with galvanised steel** which makes them difficult to bend or cut. Multi-locking points, hook bolts, heavy duty cam locks and keeps, give you **maximum security**. Fusion welded corners for extra strength and security.

THERMAL COMFORT

Thermal Comfort

Maximum insulation against heat and cold is achieved with twin weather seals, air chambers within the frame and double glazing. Condensation is eliminated totally. Decrease your energy bill by **up to 60%**. The u-value for these windows and doors is 1.9.

MAINTENANCE

Ease of Maintenance

They require little maintenance and never need painting. The specially formulated material exhibits a high impact strength and maximum resistance to weathering. Also the uPVC is partly made out of salt, so the material is perfect for use **near the ocean**.

DESIGN

Design

Quality surface finish, soft contoured profiles and style varieties, (arches, circular, triangular) that will meet your taste. Design your own window or door at no extra cost. Colonial, Modern, etc...

GLAZING OPTIONS

Glazing Options

Choose your own glass, **whether clear, tinted, laminated, overlay, leadlight or frosted glass, double or single glazed**. There are no limits to tailoring windows and doors to your needs and wants.

ACOUSTIC COMFORT

Acoustic Comfort

Double glazing, double rubber -weather seals, multi locking and low conducting uPVC frames with specifically designed air chambers work together to give you the most efficient result in beating noise by up to 65%.

LIFETIME WARRANTY

Lifetime Warranty

Our uPVC profiles **do not corrode, rot, swell, shrink or crack** and are long lasting. Therefore we can provide you with a **Lifetime Warranty**. They also increase the resale value of your home.

They look like a Million Dollars, but they are very affordable.

YOUR HOME DESERVES the BEST

Home is not only a private heaven, but also a reflection of our taste and personality. Since it is the single largest investment which most of us make, not surprisingly, we make decisions that may alter the appearance of our home with utmost caution. WINDOWS AND DOORS constitute your home's principal architectural elements. Well designed windows will enhance the value of your home significantly and will cut down the noise and heat, but not the view.

The experts:

Enviro Vision was established in 1995 here in Balcatta and together the team has over 30 years experience.

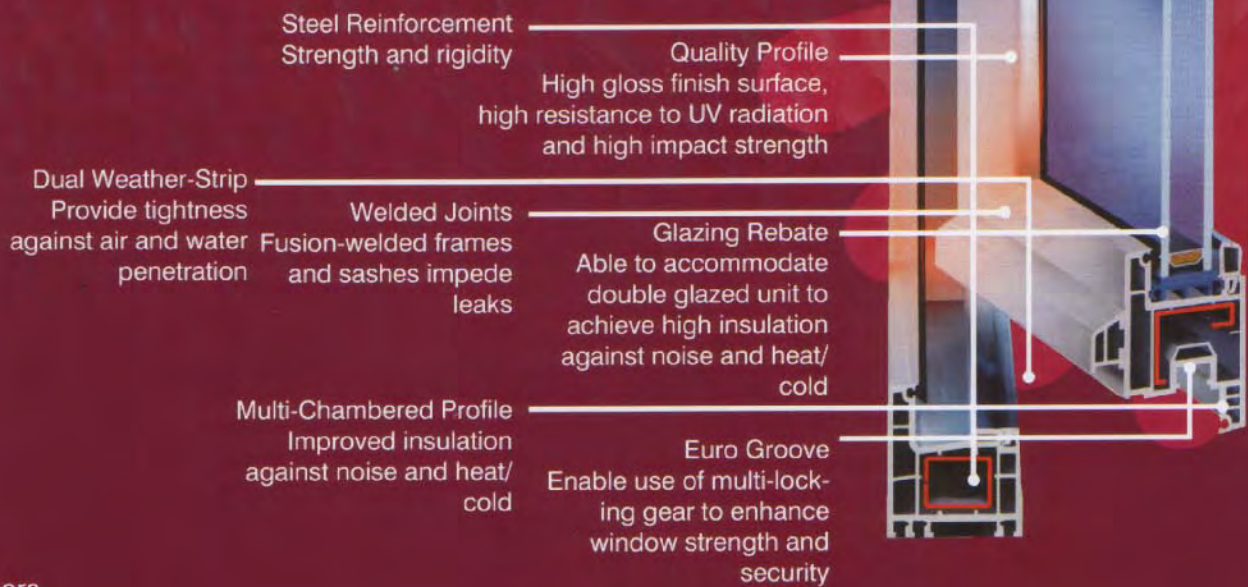

Standard
4x4mm Float

Noise Reduction
6.38 laminated glass and
4mm Float

Everything we build is custom made.

Hinged Doors

Sliding Doors

Tilt & Turn Windows

" You don't have to barricade your own house with steel bars, rollershutters and heavy drapes. With many various glass options and combinations in our windows and doors you not only get the security but you also help preserve the environment by cutting down your contribution to greenhouse gases, by 25% therefore slowing down global warming, but still letting in lots of light."

Renovations

Subframe supplied for new builds with cavity

All windows are supplied with either retractable or fixed flyscreens

Modern Homes

Custom Made

Architectural Windows

Grand Entrances

Solid door panels available

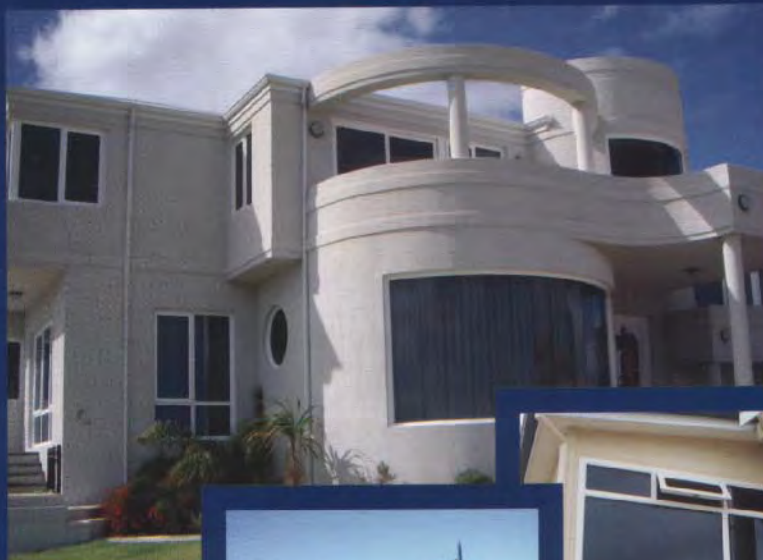

In addition to in-house tests, our systems are tested by independent institutions to meet the stringent requirements demanded in the market. They have been tested and certified for following satisfactory performance:

1. Wind Resistant: 3600pa
2. Water Penetration: 450pa
3. Air Perm.: <10m³/hr.m @ 300pa
4. Soundproofing: >STC 44
5. Thermal Insulation: $k = 2.1w/m^2.k$
6. Accelerated weathering : 4300hr
7. Mechanical and profile properties: BS 7413 complied
8. All windows and doors comply with Australian standards AS1288 and AS2047

An average Perth home produces 6 tonnes of greenhouse gases but by using ENVIRO VISION Windows and Doors you can cut these down by 25%.
